PATENT AND TRADEMARK OFFICE NOTICES

Patent Cooperation Treaty (PCT) Information

For information concerning PCT member countries, see the notice appearing in the *Official Gazette* at 1289 O.G. 4, on December 7, 2004.

Either the United States Patent and Trademark Office (USPTO) or the European Patent Office (EPO) may act as the International Searching Authority (ISA) for an international application filed with the United States Receiving Office or the International Bureau (IB) as Receiving Office where at least one of the applicants is either a national or resident of the United States of America. However, the EPO is no longer a competent ISA, within the meaning of PCT Article 16(3), for international applications filed by U.S. residents or nationals on or after 01 March 2002 in the USPTO or IB as Receiving Office, and where the application contains one or more claims directed to the field of business methods. For the definition of what the EPO considers to be precluded subject matter in the field of business methods, applicants should see the "Notice from the President of the European Patent Office," dated 26 November 2001, and which was published as Annex A in the "Notice Concerning EPO Competence to Act as PCT Authority" in the *Official Gazette* at 1255 O.G. 878, on February 19, 2002.

The European Patent Office may act as the International Preliminary Examining Authority (IPEA) for an international application filed in the United States Receiving Office or the International Bureau as Receiving Office where at least one of the applicants is either a national or resident of the United States of America, provided that the European Patent Office acted as the International Searching Authority. However, the EPO is no longer a competent IPEA, within the meaning of PCT Article 32(3), for international applications filed by U.S. residents or nationals in the USPTO or IB as a Receiving Office where the corresponding demand is filed with the EPO on or after 01 March 2002, and where the application contains one or more claims directed to the fields of business methods.

The EPO resumed its competence as an International Searching Authority and International Preliminary Examining Authority, effective January 1, 2004, for international applications filed by nationals or residents of the United States of America where the application contains one or more claims relating to the field of biotechnology. This change was announced in the *Official Gazette* at 1277 O.G. 230, on December 30, 2003.

The EPO resumed its competence as an International Preliminary Examining Authority, effective July 1, 2004, for demands filed by U.S. residents or nationals on or after July 1, 2004, for international applications filed by nationals or residents of the United States of America where the application contains one or more claims relating to the field of telecommunications. This change was announced in the *Official Gazette* at 1277 O.G. 230, on December 30, 2003.

The search fee of the European Patent Office was increased, effective April 1, 2004, and was announced in the *Official Gazette* at 1280 O.G. 868, on March 16, 2004.

International fees were changed, effective on March 1, 2005, due to a change in the exchange rate of the U.S. dollar with regard to the Swiss franc, and were announced in the *Official Gazette* at 1291 O.G. 118 on February 22, 2005.

Notice of Changes in Requirement for a Substantial New Question of Patentability for a Second or Subsequent Request for Reexamination While an Earlier Filed Reexamination is Pending

A. Summary: The United States Patent and Trademark Office (Office) revised section 2240 of the Manual of Patent Examining Procedure (MPEP) in May of 2004 to set forth a new policy when a second or subsequent request for reexamination is filed while an "earlier filed reexamination" is **pending**, and the second or subsequent request cites only prior art (hereinafter "old art") which raised a substantial new question of patentability (SNQ) in the pending reexamination proceeding. See MPEP § 2240 (8th ed. 2001)(Rev. 2, May 2004). Under the new policy, the second or subsequent request for reexamination will be ordered **only** if that old prior art raises a substantial new question of patentability which is **different** than that raised in the pending reexamination proceeding. If the old prior art cited (in the second or subsequent request) raises only the same issues that were raised to initiate the pending reexamination proceeding, the second or subsequent request will be denied.

It is to be noted that reliance on prior art cited in the pending reexamination (old art) does not preclude the existence of a SNQ that is based exclusively on that old art. Determinations on whether a SNQ exists in such an instance shall be based upon a fact-specific inquiry done on a case-by-case basis. For example, a SNQ may be based solely on old art where the old art is being presented/viewed in a new light, or in a different way, as compared with its use in the earlier concluded examination(s), in view of a material new argument or interpretation presented in the request. The presentation/viewing of old art in a new light, or in a different way, is discussed in Ex parte Chicago Rawhide, 223 USPQ 351 (Bd. Pat. App. & Inter. 1984).

B. Background: A request for ex parte reexamination of a patent pursuant to 35 U.S.C. 302, and a request for inter partes reexamination of a patent pursuant to 35 U.S.C. 311, must raise a substantial new question of patentability (SNQ) in order for a reexamination of the patent to be initiated. More than one reexamination request may be filed for the same patent, and a second or subsequent reexamination request for reexamination of a patent, where a first reexamination proceeding is pending, has historically been granted based on the **same** prior art that raised the SNQ in a pending first reexamination proceeding.

It has been the Office's experience, however, that both patent owners and third party requesters have used a second or subsequent reexamination request (based on the same substantial new question of patentability initially raised or existing in the pending reexamination proceeding) to prolong the reexamination proceeding, and in some instances, to turn it essentially into an inter partes proceeding. These actions by patent owners and third party requesters have resulted in multiple reexaminations taking years to conclude, thus making it extremely difficult for the Office to conclude reexamination proceedings with "special dispatch" as required by statute (35 U.S.C. 305 for ex parte reexamination, 35 U.S.C. 314 inter partes reexamination). For example, under the prior practice, a patent owner whose claims are rejected in a pending reexamination proceeding could repeatedly file multiple ex parte reexamination requests based on the same substantial new question of patentability raised, or existing, in the pending reexamination proceeding. By doing so, the patent owner could keep the reexamination proceeding pending indefinitely, to delay the issue of a reexamination certificate canceling the claims of the patent being reexamined. Additionally, a third party requester could file a second or subsequent reexamination request, while a first reexamination proceeding is pending, based on the same substantial new question of patentability raised, or existing, in the first reexamination proceeding, in order to address any responses to Office actions made by the patent owner. This use of a second or subsequent reexamination request has permitted third party requesters to, in effect, obtain an inter partes type of reexamination process in an ex parte reexamination proceeding.

Moreover, concerns regarding lengthy ex parte reexamination pendency resulting from multiple reexamination request filings were raised by witnesses at the Office's Round Table on the Equities of Inter Partes Reexamination Proceedings held February 17, 2004.

C. Implementation of New Policy: Responsive to these concerns, the Office revised its policy to be as is now set forth in the current (May 2004) revision of MPEP § 2240, that is: **the SNQ for a second or subsequent request for reexamination must be new and different than any SNQ that was raised, or existed, during any prior pending or concluded reexamination proceeding for the patent.** This revised policy is consistent with the statutory mandate of special dispatch and the intent of the ex parte reexamination statute (an ex parte reexamination proceeding is not an inter partes type of reexamination process). Further, 35 U.S.C. 303(a) states that "[w]ithin three months following the filing of a request for reexamination under the provisions of section 302 of this title, the Director will determine whether a substantial new question of patentability affecting any claim of the patent concerned is raised by the request." It is reasonable to interpret this provision as requiring each request for reexamination to raise its own substantial new question of patentability as compared not only to the original prosecution (in the application for the patent) and any earlier, concluded reexamination proceedings, but to pending reexamination proceedings as well. To accompany the revision of MPEP § 2240, MPEP § 2640, which was newly added to the MPEP in May of 2004 to address inter partes reexamination proceedings, was drafted to implement this revision of policy for inter partes reexamination proceedings.

D. Transition Procedure: It is noted that, as a consequence of the changes made to MPEP § 2240, a patent owner will now be prevented from obtaining entry of an amendment and/or evidence not entered after final rejection in an ex parte reexamination proceeding by filing another request for reexamination based on the same substantial question of patentability raised/existing in the pending reexamination proceeding. In order to provide relief to the patent owner, the Office plans to propose a revision to the patent rules to provide for the filing of a request for continued reexami-

nation (RCR) which would be similar to the request for continued examination (RCE) practice for applications. If the RCR practice is implemented, the patent owner, by filing an RCR, could obtain continued prosecution on the merits in the reexamination proceeding, including entry of an amendment and/or evidence that was denied entry after a final rejection in an ex parte reexamination proceeding or after an action closing prosecution in an inter partes reexamination proceeding.

Until these new rules become effective, however, patent owners are advised to use either: (1) the petition procedure under 37 CFR § 1.181 to seek review of a denial of entry of an amendment submitted after final rejection in an ex parte reexamination proceeding or after an action closing prosecution in an inter partes reexamination proceeding; or (2) the petition procedure under 37 CFR § 1.182 to seek relief that is not currently provided by an existing rule, but that would be provided when a new request for continued reexamination (RCR) practice is in effect.

E. Inquiries: Inquiries regarding this matter may be directed to Kenneth M. Schor, Senior Legal Advisor, Office of Patent Legal Administration at telephone: (571) 272-7710.

Revision of Search and Examination Fees for Patent Cooperation Treaty Applications Entering the National Stage in the United States

AGENCY: United States Patent and Trademark Office, Commerce.

ACTION: Interim rule.

SUMMARY: Among other changes to patent and trademark fees, the Consolidated Appropriations Act, 2005 (Consolidated Appropriations Act), splits the national fee for Patent Cooperation Treaty (PCT) applications entering the national stage into a separate national fee, search fee and examination fee, during fiscal years 2005 and 2006. The Office is in this notice reducing the search fee and examination fee for certain PCT applications entering the national stage. The Office has implemented the changes to the patent fees provided in the Consolidated Appropriations Act in a separate final rule.

DATES: *Effective Date:* February 1, 2005.

Applicability Date: The changes in this interim rule apply to all international applications entering the national stage under 35 U.S.C. 371 for which the basic national fee specified in 35 U.S.C. 41 is paid on or after December 8, 2004.

Comment Deadline Date: To be ensured of consideration, written comments must be received on or before April 4, 2005. No public hearing will be held.

ADDRESSES: Comments should be sent by electronic mail message over the Internet addressed to AB84.Comments@uspto.gov. Comments may also be submitted by mail addressed to: Mail Stop Comments—Patents, Commissioner for Patents, P.O. Box 1450, Alexandria, VA 22313-1450, or by facsimile to (571) 273-7735, marked to the attention of Robert W. Bahr.

SUPPLEMENTARY INFORMATION: The Consolidated Appropriations Act (section 801 of Division B) provides that 35 U.S.C. 41(a), (b), and (d) shall be administered in a manner that revises patent application fees (35 U.S.C. 41(a)) and patent maintenance fees (35 U.S.C. 41(b)), and provides for a separate filing or national fee (35 U.S.C. 41(a)), search fee (35 U.S.C. 41(d)(1)), and examination fee (35 U.S.C. 1(a)(3)) during fiscal years 2005 and 2006. *See* Public Law 108-447, 118 Stat. 2809 (2004). The Consolidated Appropriations Act provides a fee of $500.00 for the search of the national stage of each international application (Section 803(c)(1) of Division B) and a fee of $200.00 for the examination of the national stage of each international application (35 U.S.C. 41(a)(3)(D)) during fiscal years 2005 and 2006.

35 U.S.C. 376 provides that: "[t]he Director may also refund any part of the search fee, the national fee, the preliminary examination fee and any additional fees, where he determines such refund to be warranted." *See* 35 U.S.C. 376(b). Under the authority provided in 35 U.S.C. 376: (1) The Office will refund the entire search fee less $100.00 ($50.00 for small entities) if the search fee as set forth in §§ 1.445(a)(2) and (a)(3) has been paid on the international application to the United States Patent and Trademark Office as an International Searching Authority for all of the claims presented in the application entering the national stage; and (2) the Office will refund $100.00 ($50.00 for small entities) if an international search report on the international application has been prepared and is provided to the Office no later than the time at which the search fee is paid. In addition, under the authority provided in 35 U.S.C. 376, the Office will refund the entire examination fee less $100.00 ($50.00 for small entities) if an international preliminary examination report on the international application prepared by the United States International Preliminary Examining Authority states that the criteria of novelty, inventive step (non-obviousness), and industrial applicability, as defined in PCT Article 33(1) to (4) have been satisfied for all of the claims presented in the application entering the national stage.

Discussion of Specific Rules

Title 37 of the Code of Federal Regulations, Part 1, is amended as follows:

Section 1.492: Section 1.492(b) sets forth the search fees for an international application entering the national stage under 35 U.S.C. 371. Section 1.492(b) is amended to provide that: (1) The search fee for an international application entering the national stage under 35 U.S.C. 371 is $100.00 ($50.00 for a small entity) if the search fee as set forth in §§ 1.445(a)(2) and (a)(3) has been paid on the international application to the United States Patent and Trademark Office as an International Searching Authority for all of the claims presented in the application entering the national stage; (2) the search fee for an international application entering the national stage under 35 U.S.C. 371 is $400.00 ($200.00 for a small entity) if an international search report on the international application has been prepared and is provided to the Office no later than the time at which the search fee is paid; and (3) the search fee for

an international application entering the national stage under 35 U.S.C. 371 is $500.00 ($250.00 for a small entity) in all other situations.

Section 1.492(c) sets forth the examination fee for an international application entering the national stage under 35 U.S.C. 371. Section 1.492(c) is amended to provide that: (1) The examination fee for an international application entering the national stage under 35 U.S.C. 371 is $100.00 ($50.00 for a small entity), if an international preliminary examination report on the international application prepared by the United States International Preliminary Examining Authority states that the criteria of novelty, inventive step (non-obviousness), and industrial applicability, as defined in PCT Article 33(1) to (4), have been satisfied for all of the claims presented in the application entering the national stage; and (2) the examination fee for an international application entering the national stage under 35 U.S.C. 371 is $200.00 ($100.00 for a small entity) in all other situations.

Section 1.496: Section 1.496 is amended to revise its references to § 1.492 to reflect the changes in § 1.492.

Rule Making Considerations

Administrative Procedure Act: Pursuant to its authority under 35 U.S.C. 376(b), the Office has reduced the patent fees set forth in § 1.492 to less than the amount specified in 35 U.S.C. 41. Existing rights and obligations are not otherwise changed. The Office has good cause to implement this fee reduction without prior notice and comment. It is in the public interest to immediately implement the reduced search and examination fees because delay in the adoption of these fee reductions would cause harm to those applicants who currently meet the conditions for entitlement to a fee reduction. Without immediate implementation, applicants who are currently filing search and examination fees in order to avoid abandonment of their applications will be unnecessarily paying higher search and examination fees. The Office believes the public wants these new reduced fees to become effective as soon as possible as the public should benefit from the efficiencies and savings resulting therefrom. In addition, the Office believes that prior notice and comment is unnecessary because it does not expect the public to object to the reduction of search and examination fees. Moreover, the Office does not believe the public needs time to conform its conduct so as to avoid violation of these regulations. In order to give the public the immediate benefit of the Office's decision to reduce specified search and examination fees, the Office finds, pursuant to the authority provided at 5 U.S.C. 553(b)(B), good cause to adopt this change without prior notice and an opportunity for public comment, as such procedures are contrary to the public interest. *See Nat. Customs Brokers & Forwarders Ass'n v. U.S.*, 59 F.3d 1219, 1223-24 (Fed. Cir. 1995).

Nothing in this or any other law requires delayed implementation of the fee reductions. 35 U.S.C. 41(g) provides that: "[n]o fee established by the Director under [35 U.S.C. 41] shall take effect until at least 30 days after notice of the fee has been published in the Federal Register and in the Official Gazette of the Patent and Trademark Office." Since the reduced search fees and examination fees specified in §§ 1.492(b) and (c) are established by the Office on the basis of the Office's authority under 35 U.S.C. 376(b) (rather than the authority in 35 U.S.C. 41), the thirty-day advance publication requirement of 35 U.S.C. 41(g) does not apply to the reduced search fees and examination fees specified in § 1.492(b) and (c).

Accordingly, the changes in this interim rule may be adopted without prior notice and opportunity for public comment under 5 U.S.C. 553(b) and (c), or thirty-day advance publication under 5 U.S.C. 553(d) or 35 U.S.C. 41(g).

Regulatory Flexibility Act: As prior notice and an opportunity for public comment are not required pursuant to 5 U.S.C. 553 (or any other law), neither a regulatory flexibility analysis nor a certification under the Regulatory Flexibility Act (5 U.S.C. 601 et seq.) are required. *See* 5 U.S.C. 603.

Executive Order 13132: This rule making does not contain policies with federalism implications sufficient to warrant preparation of a Federalism Assessment under Executive Order 13132 (Aug. 4, 1999).

Executive Order 12866: This rule making has been determined to be not significant for purposes of Executive Order 12866 (Sept. 30, 1993).

Paperwork Reduction Act: This interim rule involves information collection requirements that are subject to review by the Office of Management and Budget (OMB) under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 et seq.). The collection of information involved in this interim rule has been reviewed and previously approved by OMB under the following control number: 0651-0021. The Office is not resubmitting an information collection package to OMB for its review and approval because the changes in this interim rule do not affect the information collection requirements associated with the information collection under this OMB control number.

Interested persons are requested to send comments regarding this information collection, including suggestions for reducing this burden, to Robert J. Spar, Director, Office of Patent Legal Administration, United States Patent and Trademark Office, P.O. Box 1450, Alexandria, VA 22313-1450, or to the Office of Information and Regulatory Affairs of OMB, New Executive Office Building, 725 17th Street, NW., Room 10235, Washington, DC 20503, Attention: Desk Officer for the United States Patent and Trademark Office.

Notwithstanding any other provision of law, no person is required to respond to nor shall a person be subject to a penalty for failure to comply with a collection of information subject to the requirements of the Paperwork Reduction Act unless that collection of information displays a currently valid OMB control number.

MAILING AND HAND CARRY ADDRESSES FOR MAIL TO THE UNITED STATES PATENT AND TRADEMARK OFFICE

MAIL TO BE DIRECTED TO THE COMMISSIONER FOR PATENTS

For most correspondence (e.g., new patent applications) no mail stop is required because the processing of the correspondence is routine. **If NO mail stop is included on the list below, no mail stop is required for the correspondence.** See the listing under "Special Mail Stops Applicable To Both Patent And Trademark Mail" for additional mail stops for patent-related correspondence. Only the specified type of document should be placed in an envelope addressed to one of these special mail stops. If any documents other than the specified type identified for each special mail stop are addressed to that mail stop, they will be significantly delayed in reaching the appropriate area for which they are intended. The mail stop should generally appear as the first line in the address.

Petitions for a foreign filing license may be faxed to: 703-305-7658.

Some correspondence may be submitted electronically. See the Office's Internet Web site http://www.uspto.gov for additional information.

Reference Collections of U.S. Patents and Trademarks
Available for Public Use in Patent and Trademark Depository Libraries

The following libraries, designated as Patent and Trademark Depository Libraries (PTDLs), receive patent and trademark information for the U.S. Patent and Trademark Office. Many PTDLs have on file patents issued since 1790, trademarks published since 1872, and select collections of foreign patents. All PTDLs receive both the patent and trademark sections of the *Official Gazette of the U.S. Patent and Trademark Office* and numerical sets of patents in a variety of formats. Patent and trademark search systems in the Cassis optical disk series are available at all PTDLs to increase access to that information. It is through the optical disk systems and other depository materials that preliminary patent and trademark searches may be conducted through the numerically arranged collections.

Each PTDL offers reference publications which outline and provide access to the patent and trademark classification systems, as well as other documents and publications which supplement the basic search tools. PTDLs provide technical staff assistance in using all materials.

All information is available for use by the public free of charge. However, there may be charges associated with the use of on-line systems, photocopying and related services.

Since there are variations in the scope of patent and trademark collections among the PTDLs, and their hours of service to the public vary, anyone contemplating use of these collections at a particular library is urged to contact that library in advance about its collections, services, and hours in order to avert possible inconvenience.

Partnership PTDLs provide enhanced and expanded services for which fees are charged. They offer on-line patent text and image searching, on-line trademark searching, and videoconferencing for examiner interviews and workshops. They accept disclosure documents on site, order file wrappers, assignment documents and certified copies for their customers, and host a variety of seminars aimed at specific audiences, including practitioners, paralegals, and independent inventors. Currently, partnerships are located at the Great Lakes Patent and Trademark Center (GLPTC) at the Detroit Public Library in Detroit, Michigan and the Sunnyvale Center for Innovation, Invention and Ideas (SCI^3) at the Sunnyvale Public Library in Sunnyvale, California.

SECTION 1.— INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).

SECTION 2.— INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).
